### **Closing Comments**

Thank goodness for technology as in “olden” days for genealogy when the typewriter was king as was the mail service with envelope, paper, pen and stamps. But with Internet access, it can be almost as easy as a mouse click away from doing original research. The Internet almost makes telephone calls obsolete as text messaging has done so for emailing and voice messaging as well. Welcome to the 21st century of doing genealogy and communications in general in 2022. Smile, your genealogy pursuits will be enhanced in the future.
